

## BlackBaller "Pro" v3.5.0

By Killer Mobile Software LLC  
www.killermobile.com  
info@killermobile.com

BlackBaller Pro is an easy to use Call & Message (SMS/MMS) handling application. The program allows you to setup preferences as how to handle calls/SMS/MMS from different numbers. You can choose to filter calls, auto respond via SMS or use the application like an answering machine. **BlackBaller was the Original & First Call & SMS filtering application on the market back in 2003. Don't accept immitations!**

\*\*\*\* You can purchase a license for continued use directly from [www.killermobile.com](http://www.killermobile.com) \*\*\*\*

**BLACKBALLER** 8

Call Filter. SMS Filter. Anti-Spam.

Another Killer App by **KILLER MOBILE** SOFTWARE DEVELOPMENT

Nokia 3250, 5230, 5230 T-Mobile Nuron, 5228, 5235, 5320 XM, 5320 XM, 5500, 5530 xpress, 5700, 5730 Xpress, 5800 Xpress, 6110, 6120, 6121, 6210, 6220, 6290, 6710 Navigator, 6700 Slide, 6710 Navigator, 6720 Classic, 6730 Classic, 6760 Slide, 6788, 6788i, 6790 Surge, 6790 Slide, C5-00, C6-00, C7, E5-00, E50, E51, E52, E55, E60, E61, E61i, E62, E63, E65, E66, E70, E71, E71x, E72, E75, E75, E90, N69, N71, N73, N75, N76, N77, N78, N79, N80, N81, N81 8GB, N82, N85, N86, N91, N92, N93, N95, N95 8GB, N96, N97, N97 Mini, X5, X6, N8, Sony Ericson Satio, LG KS10, Samsung SGH-G810, Samsung INNOV8, Samsung SGH-L870

**Note: the Answering Machine feature will only be compatible with Nokia S60 devices Only**

*What's New? Now compatible with Symbian 3. Supports filtering of Spam SMS messages that arrive as letters not numbers, pattern filtering and more!*

### INSTALLING/UNINSTALLING

The application should be installed the same as all native Symbian applications. Transfer the application to your device via Bluetooth, USB, etc, or Download OTA and you will be prompted automatically to install the application.

**NOTE:** Install to your internal device memory for optimum performance & stability. Save clips to your memory card.

### OVERVIEW

BlackBaller Pro is an easy to use Call & Message (SMS/MMS) handling application. The program allows you to setup preferences as how to handle calls/SMS/MMS from different numbers. You can choose to filter calls, auto respond via SMS or use the application like an answering machine.

**With BBPro you can:**

- > Filter Calls & SMS's (Blacklist)
- > Auto Reply via SMS to an incoming call or SMS with a pre-formatted message
- > Play a voice message to the caller
- > Setup an on-device answering machine
- > View full logs of each Filtered event
- > Restore Filtered SMS's to the native messaging app
- > Create unique Voice clips for each caller
- > And much, much more!

**BBPro is highly configurable:**

- > Set how long the device should ring before taking over the call
- > Allows you to interrupt the app even after it takes over the call
- > Set up to two different SMS Auto Replies for for both Calls & SMS's, even set a timed delay before sending!
- > Be prompted each time you manually reject a call to add this number to your blacklist
- > Create lists that include all Contacts, All non Contacts or All callers, or use patterns with wildcards for the ultimate in flexibility!

**NOTE: Install to your internal device memory for optimum performance**

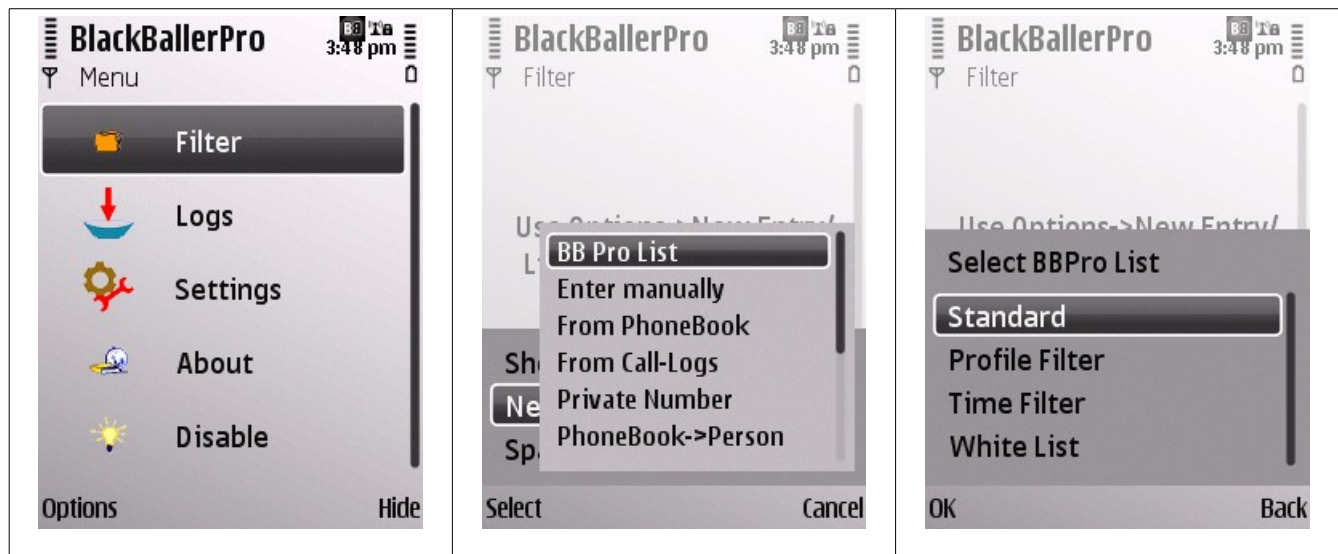

Easily create your filters using number(s) from your Contacts, Call Logs, input them manually or utilize patterns (even use wildcards). You can also create a **Killer Mobile** exclusive "BB Pro List" and group your contacts, patterns or numbers into one single list and setup preferences for the entire list. All the calls/messages from those numbers will be handled as per the preferences setup in the BB Pro list. BBPro lists can also be set to be automatically enabled based on Profile or Time, and also support White Lists (all calls NOT on the list will be filtered).

**BlackBaller Pro can be easily enabled & disabled from the Main settings screen by toggling the Enabled option.**

-----  
**GETTING STARTED**  
-----

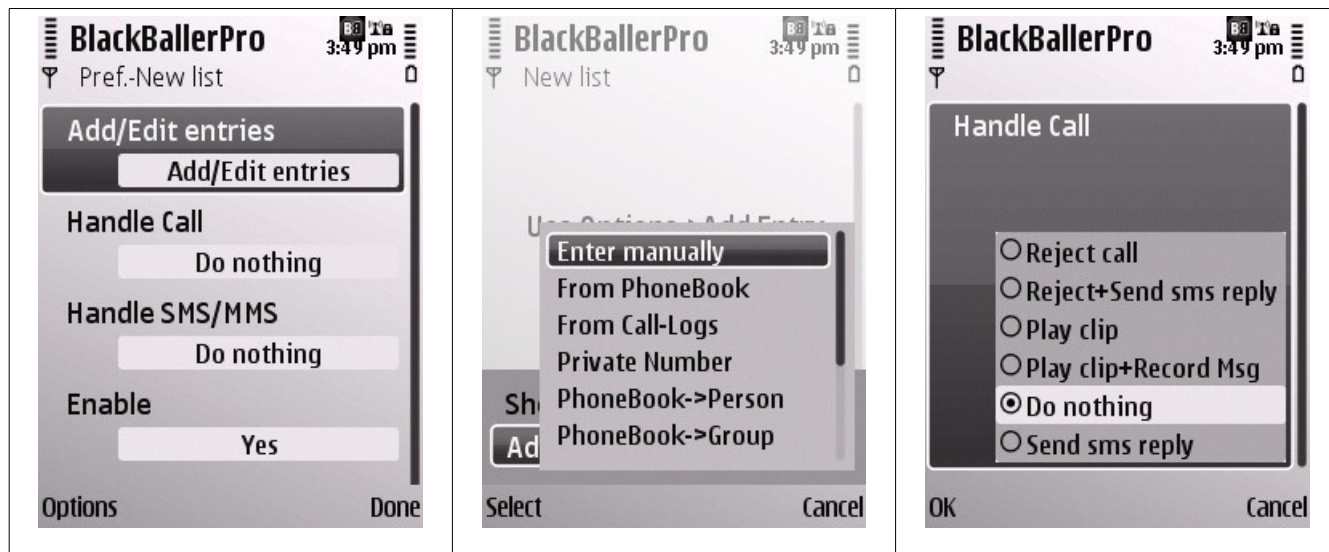

-----  
**FILTER**  
-----

The first thing you'll want to do is to create a new **Filter**. In BlackBaller Pro we've made this as simple as possible. From the MAIN FILTER MENU simply press Options -> New Entry/List -> then choose the type of Entry or List you want to create. The most flexible solution is our exclusive "BB Pro List" which allows you to setup actions for more than one number at the same time, while also applying powerful scheduling or profile rules for maximum flexibility!

However you can also choose to create Entries manually, from your Contacts, Groups, Call Logs, or Even have the action apply to Unknown, Private or Withheld numbers (Referred to As "Private Number" in the application).

Once you've choose the Entry/List type for the BBPro List or Entry you'll now want to add numbers to the list. You can choose to add contacts, groups, numbers manually and more by editing the **Add/Edit Entries** setting. Once this is done, for both Entry/List types, you'll now setup the behavior for the List or Entry. BBPro now features separate Call & SMS Handling settings. Once you're done, make sure you have the Entry/List enabled and you're ready to start enjoying the benefits of BlackBaller.

*\*\* While filtering calls/messages Profile Entry is given first preference followed by Time Filter then all the other entries and Pattern entry is given the last preference*

**Options-> Spam Numbers** – Allows you to set your country and download our group Spam number list reported by other BlackBaller users. Numbers must be reported a certain number of times by unique users for the number to make it to our list. **Standard Data use charges apply when downloading the Spam DB. Update frequently for best results.**

**Options-> New List/Entry** (create a new BBPro list, or Entry to start setting up your call management needs)

- \* BB Pro List
- \* Enter Manually
- \* From Phone book
- \* From Call Logs
- \* Private Number (includes Withheld & unknown numbers)
- \* Phone book->Person
- \* Phone book->Group
- \* All Contacts
- \* All Non Contacts
- \* All Callers
- \* Pattern
- \* Marketing SMS Pattern (Allows you filter SMS messages that arrive from senders that show as letters not numbers).

**+ The BB Pro List will have FOUR Configuration options:**

- + **Standard**
- + **Profile Filter** (The list will be activated based on a preset Profile)
- + **Time filter** (The list will be active/deactivated based on a set time - you will need to set an Active To & From Time)
- + **WhiteList** (All numbers that are NOT on this list will be filtered)

>> Once you've created your list, you now need to add entries to it. Click the list you just created then on the **Add/Edit** Entries option to start adding entries to your list. You will have similar options as indicated above. Once you have setup your list entries, you have two options. To set default List handling parameters or to setup specific handling parameters for each entry in the list.

**\*\* Note that entry specific parameters will override the default list parameters.**

->> If you have created a single entry, you will go straight into setting up the handling parameters for this number(s):

\* **Add/Edit Entries** – Add the numbers, contacts, group or call log that you wish to apply this filter to

\* **Handle Call** – Setup how you want to handle the incoming calls. You will see additional settings depending on what you choose

\* **Handle SMS/MMS** – Setup how you want to handle incoming SMS. You will see additional settings depending on what you choose

>>> **Additional Options** you may see depending on your settings

\* **Interval B4 Sending SMS** – Delay before sending the SMS Auto Reply

\* **1st/2<sup>nd</sup> SMS reply text** - SMS text that is sent to the caller when the Handle Call/Handle SMS/MMS is set to Send SMS Reply.

\* **Reply SMS behavior** - Frequency of sending the SMS response (Send one per day/Send always) Note: If you have two responses set, then it will send the first, and second response (2 SMS's in Total, if you have it set to send one per day)

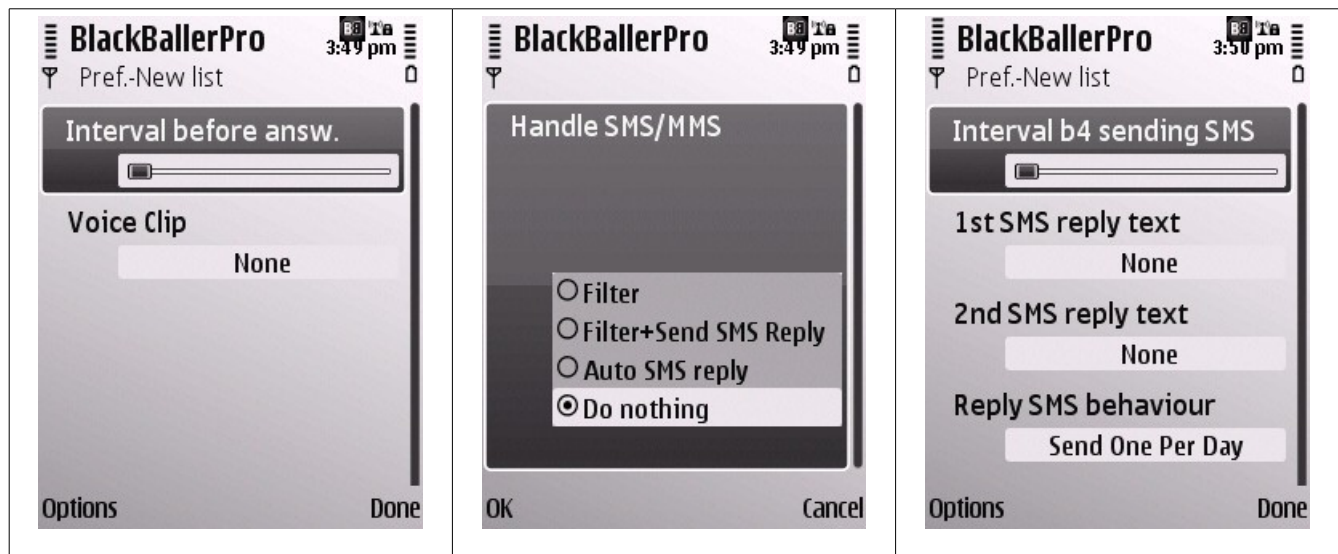

\* **Voice Clip** ( only available if set to Play Clip or Play Clip & Record Msg) - The file that will be played to the caller when Handle Call is set to Play Clip/Play Clip+Record Msg. Only AMR files are allowed. You can record a message on the fly directly from this setting or choose from any AMR file available in your file system.

\* **Interval before Answer** (in Seconds – only available if set to Play Clip or Play Clip & Record Msg) - the time before the application will kick in and answer the call.

\* **Enable** (yes/no) - Enable this list

>> **Press Done** when you have finished setting up the preferences

**NOTE: If you want to back out of creating a list press Options-> Cancel**

#### NOTES

>> In the Main screen highlight the entry you wish to edit and select Options->Edit Entry to edit the preferences. You can also do it by pressing the Joystick.

>> If the entry selected is a BB Pro List then editing it will open another screen where you can add entries. This way you can group multiple entries in a list.

#### SPAM DB FEATURE

Another of BlackBaller's exclusive features is our SPAM Database. This feature allows you to report spam numbers (either on the fly depending on your settings, or manually directly from your List/Entries) directly to our DB (standard data connectivity charges will apply). You can also download your country's current Spam DB list directly to the application and include auto filtering of numbers that other users have reported in your country.

To download your country's Spam DB, from the main filter screen choose **Options** → **Spam Numbers**. Choose your country then **Options** → **Update Spam Numbers**, then choose your preferred Access Point. The latest Spam numbers in your country will be automatically downloaded and assigned to your List.

### LOGS SCREEN

---

Allows you to view a log of filtered calls & Messages (with the message content). Any new messages or events will show up as new. You can either view their details, or from the Options mark as read or delete the log. SMS's can also be restored back to the native SMS logs from the Options menu.

### SETTINGS SCREEN

---

- + **Smart Reject Sensor** – The Smart Reject Sensor will prompt you to add any number that is not filtered by the BlackBaller.
- + **Log Duration** - Sets how many log entries are saved.
- + **Voice Msg Duration** - Maximum amount of time callers can record a message
- + **AutoStart** – Starts up the application each time you reboot your device.
- + **Password** - Set the password to access the application. If not set, password protection will not be active
- + **Indicator** - Show the BB indicator Enabled/Disabled
- + **Clip Location** - The location where the recorded clips will be stored Phone Memory/Card Memory
- + **Taskbar Visibility** - Indicates if you want the app icon hidden or displayed in the taskbar when viewing running apps
- + **Filtered Prompt** - If enabled will prompt you will see a dialog after each filtered event prompting you to view the log
- + **Spam Prompt** - If enabled will prompt you to report a rejected number to our Spam DB (Normal Data use charges apply)
- + **Debug** - Only use if you are experiencing issues. Enable this setting, repeat the issue, and send us the debug log found in C:
- + **Play Method** - In the rare instance you are having issues with the audio play back when using the app as an answering machine, you can adjust this setting to resolve
