

Total Recall v4.20

By Killer Mobile Software LLC
www.killermobile.com
info@killermobile.com

Total Recall is the best selling, feature packed Call Recorder utility for Nokia S60 devices running the Symbian OS. Total Recall integrates the most cutting edge beep suppression available to deliver high quality recorded, beep free audio on most devices, and offers a rich feature set in one extremely easy to use application.

**** You can purchase a license for continued use directly from www.killermobile.com ****

Total Control over  **which Calls You Record!** 

Another Killer App by 

COMPATABILITY

All Nokia Series 60 (S60) 3rd & 5th Edition Devices are supported. S60 2nd Edition devices are also supported, however by a version of the application that is no longer updated and has fewer features.

Full Two Side, No Beep Recording >>

Nokia 3250, 5500, 5700, 6110, 6120, 6121, 6210, 6220, 6290, E50, E51, E60, E61, E61i, E62, E63, E65, E66, E70, E71, E75 E90, N69, N71, N73, N75, N76, N77, N78, N79, N80, N81, N81 8GB, N82, N85, N86, N91, N92, N93, N95, N95 8GB, N96, 5320 XM, 5320 XM, 5800 Xpress Music

*** The E50, E51, E71 will perform a profile change as part of the beep suppression before and after the recording of the call.*

NOTE: Due to frequent firmware updates the beep may be heard on the device side even on devices indicated above. Please test the application prior to purchase.

Device will Beep (Caller will not hear the beep) >>

C5-00, C6-00, E5-00, E52, E55, E72, N97, N97 mini, X6, 5235, 5530 xpress, 5730 Xpress, 6700 Slide, 6710 Navigator, 6720 Classic, 6730, 6760 Slide, 6788, 6788i, 6790 Surge, 6790 Slide

INSTALLING/UNINSTALLING

The application should be installed the same as all native Symbian applications. Transfer the application to your device via Bluetooth, USB, etc, or Download OTA and you will be prompted automatically to install the application.

*** NOTE:** Install to your internal device memory for optimum performance & stability. Save clips to your memory card.

To uninstall the application, go to the App. Manager (Typically Menu -> Settings - Data Mgr -> App Mgr), select Total Recall from the list, and choose **Options -> Remove**. This will uninstall the application completely.

REGISTRATION

The application by default is in a 14 day trial mode state when first installed. Upon the first install you will be prompted to input your registration code, but during the 14 day demo period you will be able to bypass by choosing "Trial". You can input your registration at any time from the main Options menu.

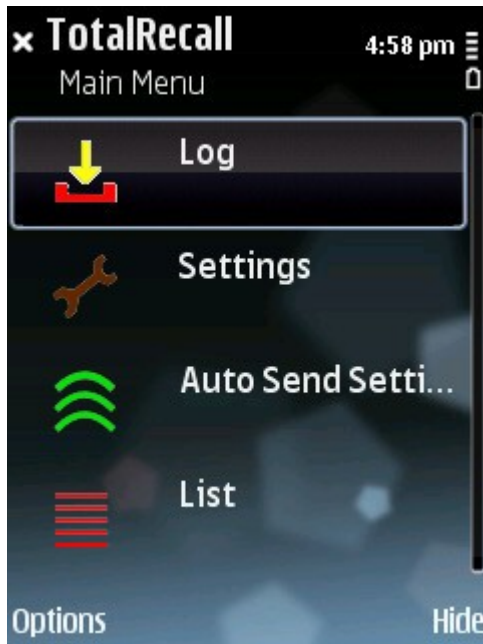

If you already have a registration code, you can input it into the Reg. Code field and press the "Register" button (left Softkey).

IMPORTANT NOTES - PLEASE READ!

I - Total Recall, as are all call recording applications, require more memory than the typically application, and as such may require that you reset and format your device more frequently than normal. If the application begins behaving randomly, please check your available internal memory, and perform a hard reset of your device.

II - Killer Mobile License Policy. The purchase of Total Recall is for a license of the application to be used on one device. In case of a device change or loss, we allow one additional license in the event the application was purchased directly from www.killermobile.com

MAIN MENU:

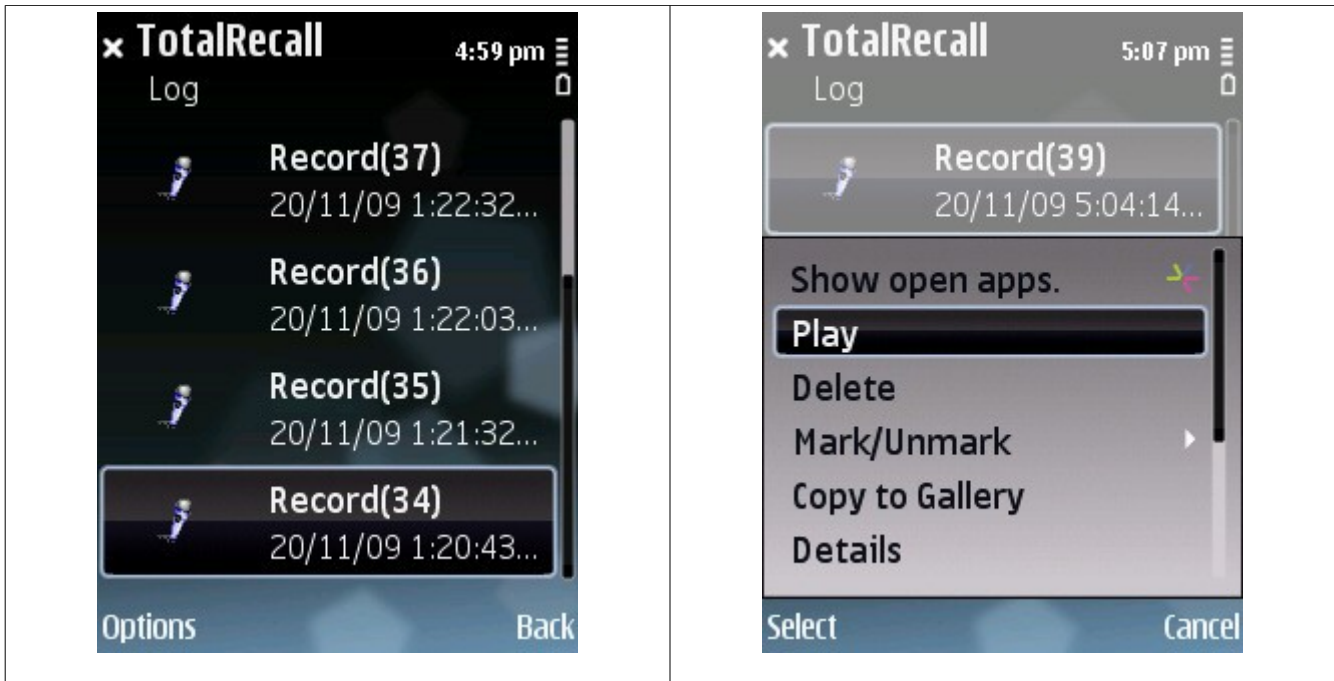

-> Options (Left Softkey)

- + Refresh Access Point - Allows you to set an access point to use when uploading clips using the HTTP method
- + Register - Input your registration code
- + Start/Stop Recording - Allows you to manually start/stop/pause recording, either manual (dictaphone) or while on a call
- + Exit - Exits the application

-> Hide (Right Softkey)

**** PLEASE NOTE - Exiting the application will disable the ability to record calls. "Hide" the application if you simply want it to go to the background.**

LOG: (Where the recorded call logs are stored)

-> Options (Left Softkey)

+ Play - Plays the clip

+ Record - Records a voice note

+ Delete - Deletes the selected clip

+ Mark/Unmark

* Mark - Mark the clip to perform an action

* Mark All - Mark all clips, to perform an action on all (ie, send, delete etc)

+ Copy to Gallery - Copies the clip(s) to the default device media gallery for easy access outside of Total Recall

+ Details - Displays the clip details (file size, duration, format, etc)

+ Rename - Allows you to manually rename the clip

+ Edit Note - Edit a text note assigned to the clip (only valid on device)

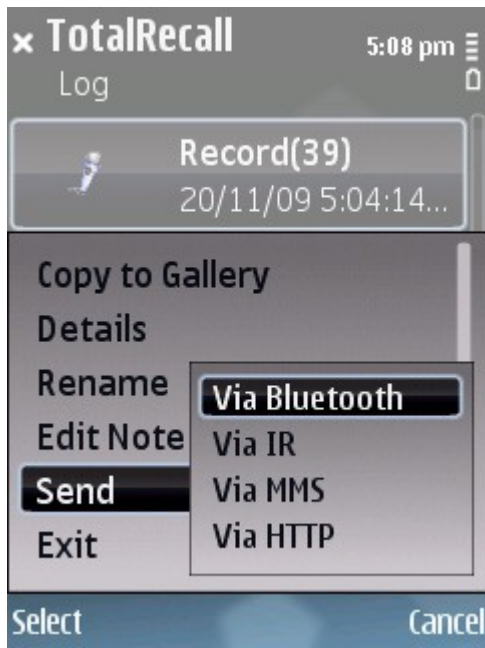

+Send

* Via Bluetooth

* Via IR

* Via MMS

* HTTP (Only if you have a KM web user account - for registered users only!) This will use the settings you have set in the AutoSend settings. Please adjust these settings accordingly before using this feature.

-> Back (Right Softkey)

----- **MAIN SETTINGS:** -----

-> Recording Format - WAV OR AMR sound recording format selection for call recording. WAV may not be supported by all devices due to the beep suppression technique being used. The WAV format will use much more memory than AMR.

-> Dictaphone Format - WAV or AMR sound recording format to be used during dictaphone recording.

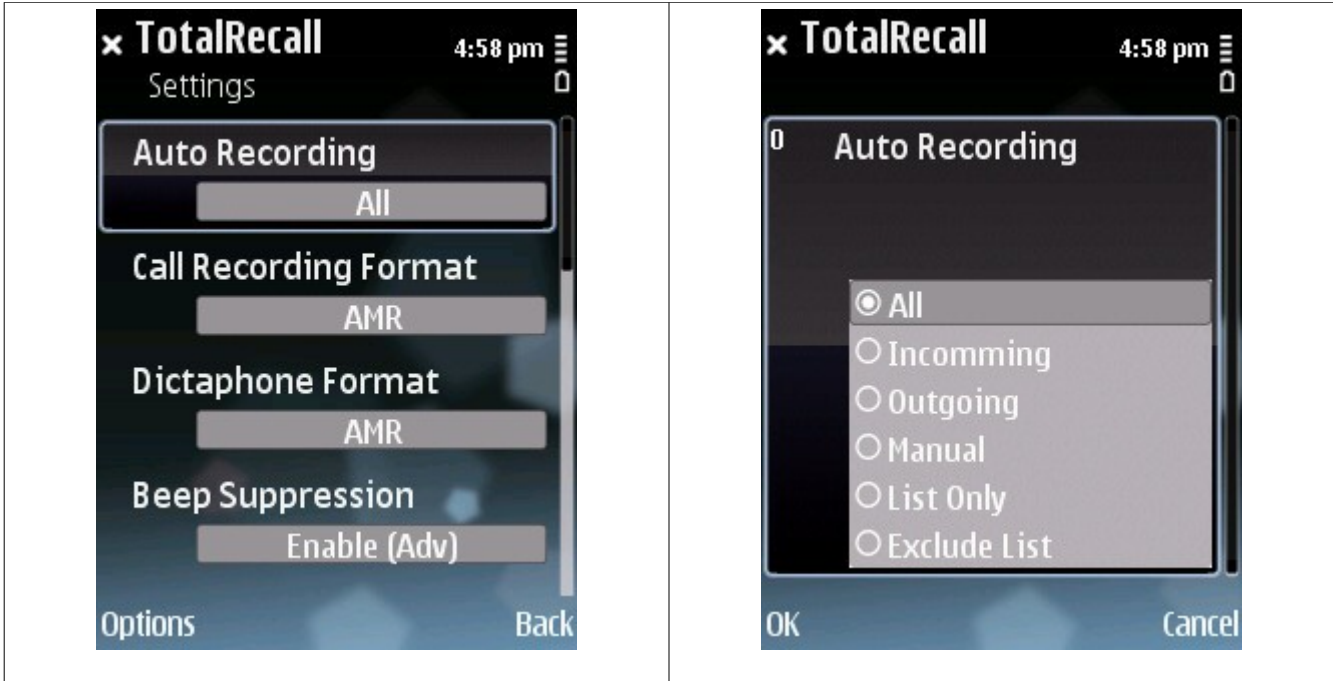

-> Beep Suppression - Typically you will not need to adjust this, however if you want to enable the beep, adjust this to "Disable"

- + Disable - Beep will be heard
- + Enable - Beep turned off
- + Enable (Adv) - Available on FP2 and 5th edition devices - suggested

-> Auto Recording -

- +ALL (Default setting) - records all incoming/outgoing calls automatically
- +Incoming - Records all incoming calls automatically
- +Outgoing - Records all outgoing call automatically
- +Manual - user need to start/stop recording manually by using main menu or by using hot keys
- +List - records only the numbers that you have setup on your list. The List can be setup by choosing the "List" option from the main menu.

- +Exclude list - records all calls EXCEPT those on the list

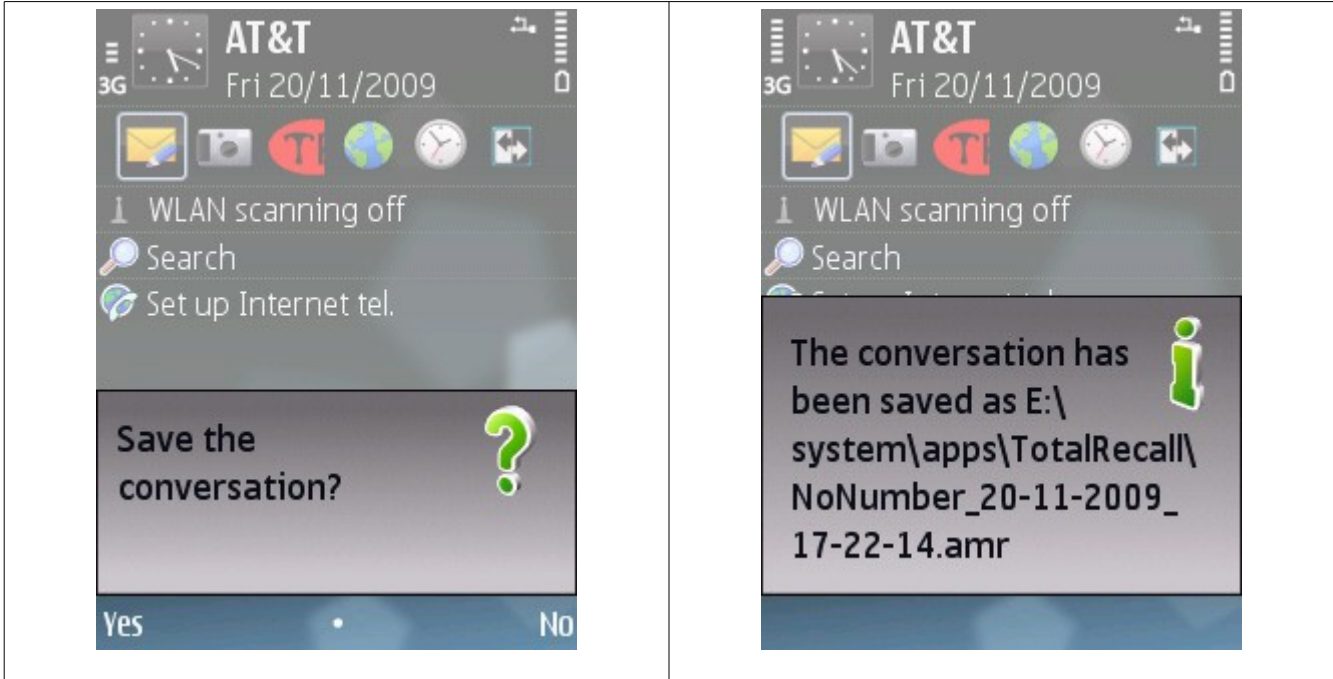

-> Save In - This allows you to choose where you want the clips to be saved. Options are Phone (clips will be private to the application), Phone Gallery, Memory (clips will be private to the application), Memory Gallery.

If not saved or copied to the Gallery, clips can be found using a 3rd party file manager such as Sexplorer or Ybrowser in the following directory:

- Internal Memory: C:\System\Installed Apps\Total Recall\.....
- Memory Card: E:\System\Installed Apps\Total Recall\.....

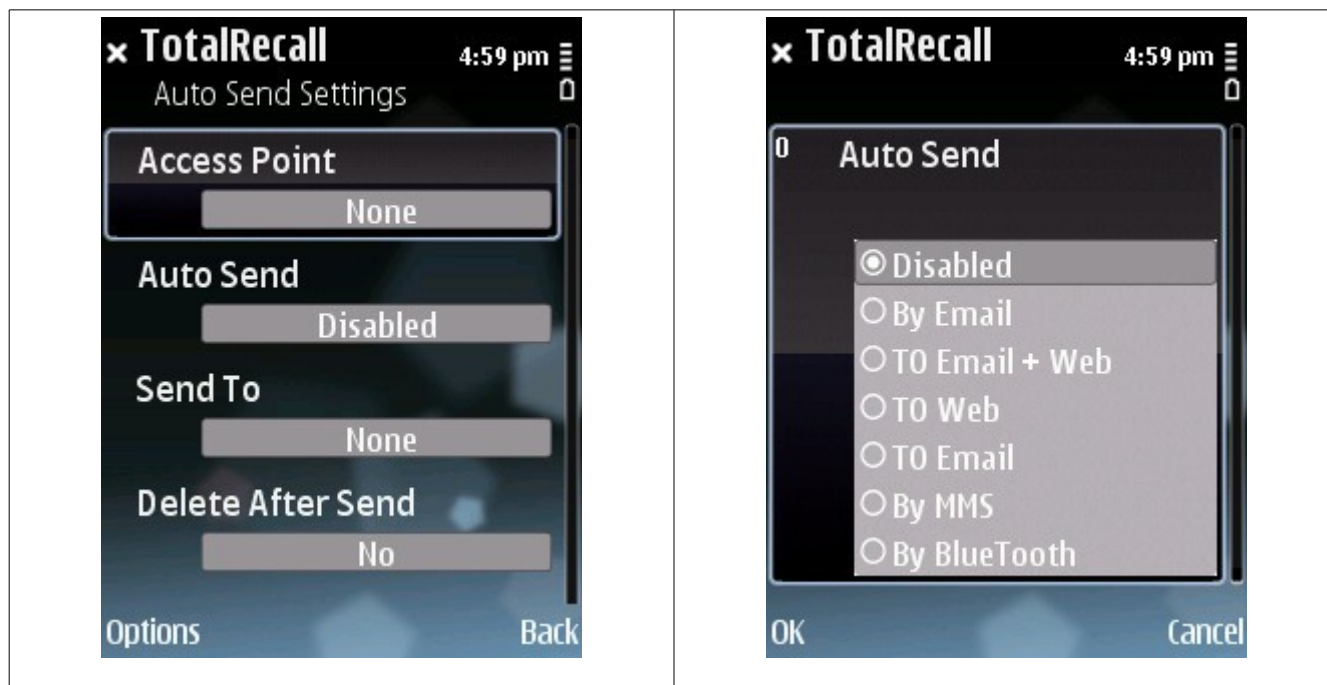

-> Ask Before Save - Prompts you to save the clip at the end of the call. Choosing "no" will delete the clip.

-> Display End of Call Summary - At the end of the call displays information regarding the storage & length of the clip.

- > Password Protection - Enables application password protection. If set to yes, password must be set.
- > Password - Sets the password to enter the application (if password protection is set to "yes"). This password must be numerical and SIX (6) characters.
- > System Application - Setting this to Yes will help prevent the application from being shut down by the device during low memory situations (**Highly suggested!**)
- > Auto Start – Enable or disable auto start at device boot up.
- > Hot Key - If set to yes, will allow you to manually start recording (on or off of a call) using a hot key combo. The hot keys are as follows:
 - Start/Stop Recording - ##
 - On the Nokia E71, E66 and 5800 the hot key will be a long, green answer/send key press (** will not work)
 - The hot key may not function on the N97
- > Debug Log - If set to yes the application will create a running log to assist us in tracking down any issues you may be having. Do not enable this unless you are experiencing issues. Log will be found in C:\TotalRecallDebug.txt

AUTO SEND SETTINGS

-> Auto Send - If enabled will Automatically send the clip per the setting

- Disabled - Will not Auto Send
- By Email - Uses the devices native email client for sending. Must indicate email address in the "Send To" setting

+ By KM Email + Web - If you are a registered user and have a KM web user account, you can send your clip over our servers without the need of having an email account setup on the device. This setting will also upload the clip to the KM web storage account which registered users may request. You must indicate an email address in the "Send To" setting

+ KM Web - Same as above, but only uploads to the KM web storage account

+ KM Email - Same as above, but only sends via the KM email servers. You must indicate an email address in the "Send To" setting

+ MMS - Sends the clip via MMS. 300kb file size limit. Must indicate a phone number to send to in the "Send To" setting

+ Bluetooth - Will send to the default connected bluetooth device in range

-> Send To - recipient of the auto send data, can be an email address or phone number (for MMS's)

-> Delete After Send - Auto deletes the file after being sent

***** KM Web User Account Info!******

Use of the KM web user account & KM email requires a working data connection. Normal data use charges apply. If you have already requested your KM web user account You can access all uploaded data at the following URL:

<http://www.killermobilesoftware.com/panel>

Default Login:

User: IMEI

Pass: 5555 (you can and should change this after first login)

Clips will be found under the "Files" option. There is a 150mb size limit to your web account.

LIST

If the Auto Recording setting on the settings screen is set to "List" or "Exclude List", you can create the list of numbers that will be automatically recorded or excluded from recording here:

-> Options

- + Add Number
 - From Contacts - Add a number to your list from your contacts
 - Enter Manually - Manually input the number
 - Private Number - Add a private, withheld, or unknown number
- + Add Person - Add a number from your contacts
- + Add Group - Add a contacts group
- + Delete - Delete the selected Contact
- + Mark/Unmark

-> Back - When you're done creating your list, press the "Back" button to return to the main menu
